APPRENTICES & TRAINEES

Early trend estimates

Introduction

This publication presents early estimates of apprentice and trainee commencements for the December quarter 2011. Indicative information about this quarter is presented here; the most recent figures are estimated, taking into account reporting lags that occur at the time of data collection.

The early trend estimates are derived from the National Apprentice and Trainee Collection no.70, December 2011. Data are only available for commencements at the national level and have been seasonally adjusted and smoothed. Further information at the disaggregated level for the December quarter 2011 will be released in early June 2012.

Highlights

Early indications for the December quarter 2011 show that:

- Trade commencements have decreased, after only one quarter of slight growth. Trade commencements have now decreased in four of the last five quarters.
- Non-trade commencements have increased, marking a return to the steady upward trend displayed from the June quarter 2009 to the March quarter 2011, following declines in the June and September quarters of 2011.

Note: (a) The December quarter 2011 estimate is based on an early estimate which is seasonally adjusted (based on data from September 2001 to December 2011) and 7-point Henderson smoothed. Only the December quarter 2011 estimate from this series is presented. The quarterly data presented to September 2011 have been seasonally adjusted (based on data from September 2001 to September 2011) and 7-point Henderson smoothed. These are consistent with the forthcoming September quarterly 2011 publication.
